

# AppNeta NMP for Mac installation

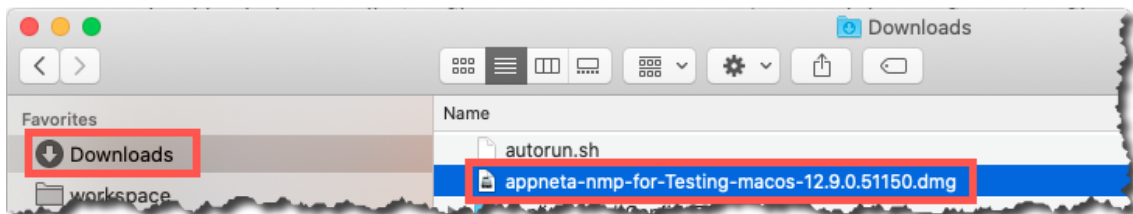

The AppNeta Native Monitoring Point (NMP) software allows your IT team to monitor your network performance in order to proactively resolve network issues you may experience.

## Install the NMP software on macOS

1. Download the installation file (**appneta-nmp-for-<org>-macos-<version>.dmg**) as provided to you by your IT team. Save this file to your **Downloads** folder.
2. On your Mac, open **Finder**.

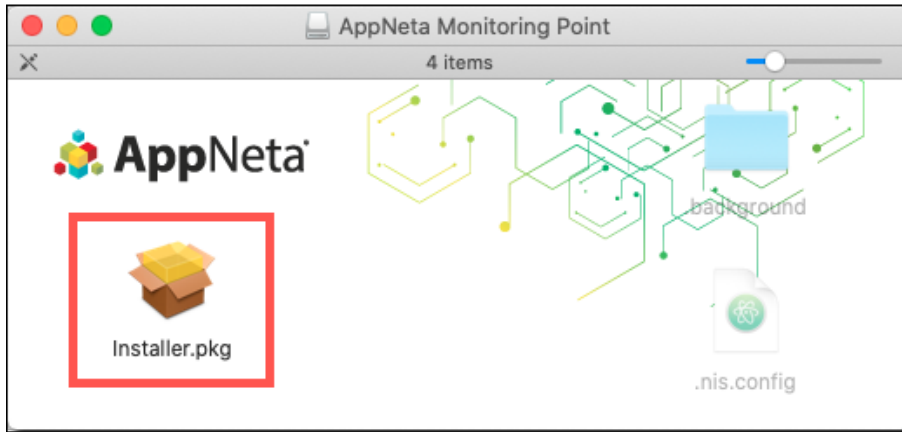

3. Select the **Downloads** folder and double-click the downloaded file (e.g., **appneta-nmp-for-<org>-macos-<version>.dmg**).

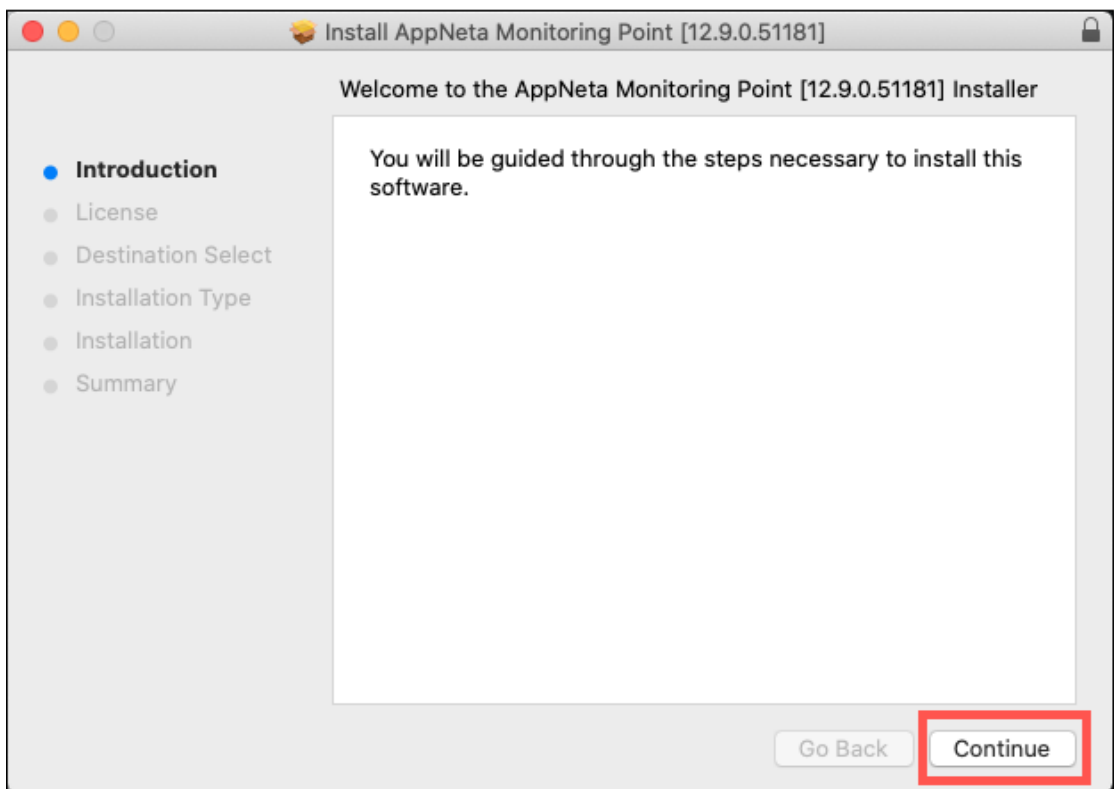

4. Double-click **Installer.pkg**.

5. Click **Continue**.

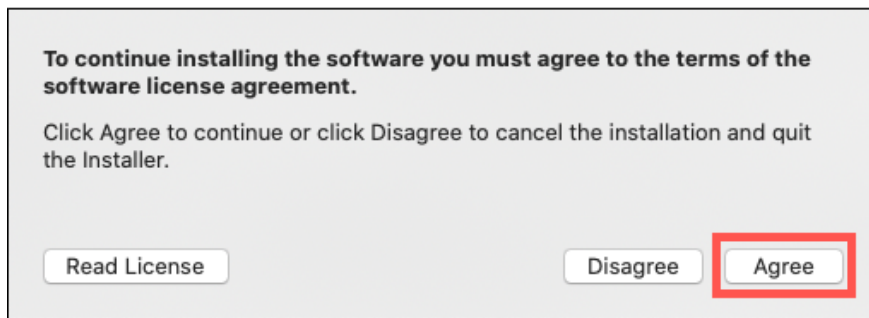

6. Review the license agreement and click **Continue**.

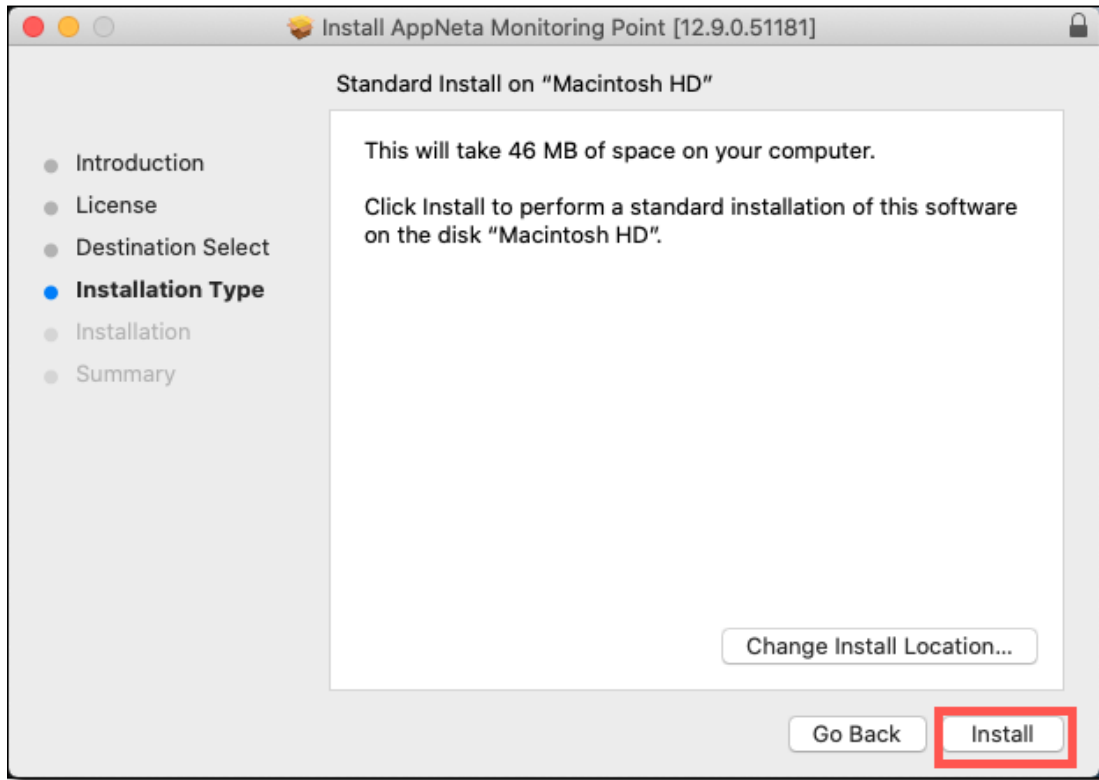

7. If you agree to the terms of the license agreement, click **Agree**.

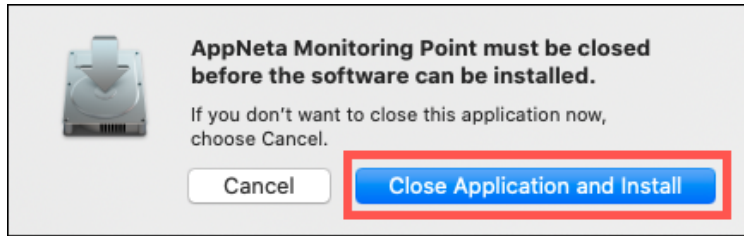

8. Click **Install**.

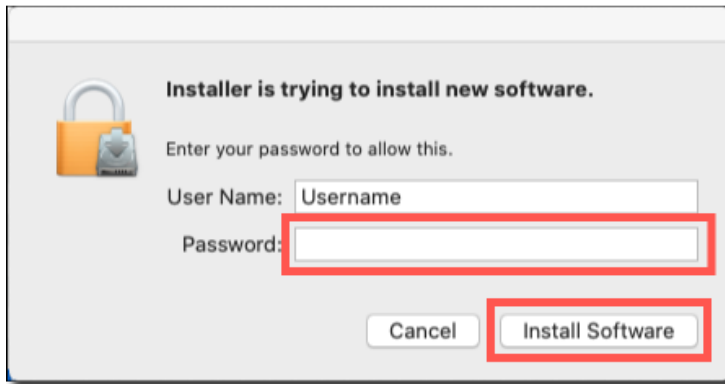

9. If prompted, click **Close Application and Install**.

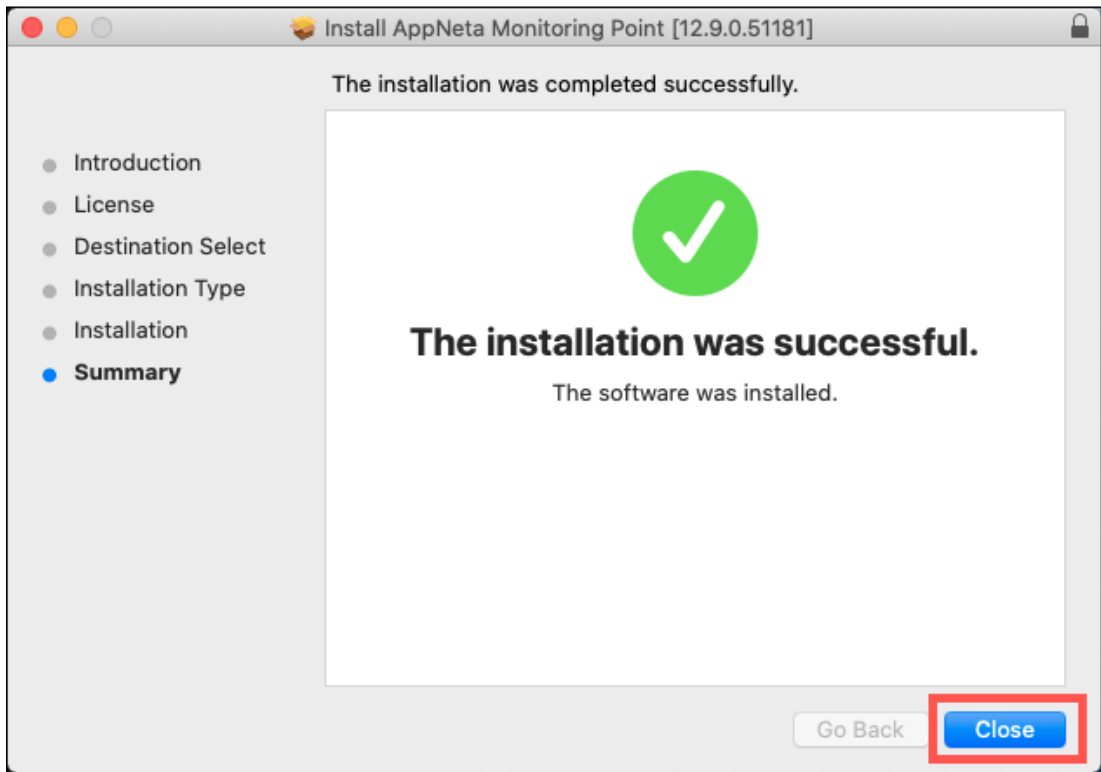

10. If prompted, enter your password and click **Install Software**.

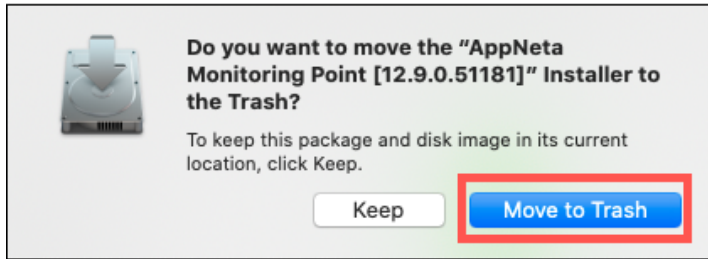

11. On successful installation, click **Close**.

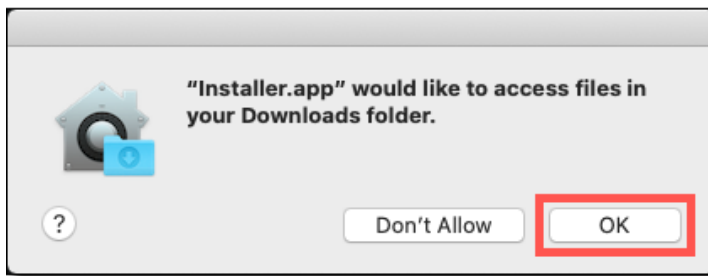

12. If prompted to move the installer to the Trash, click **Move to Trash**.

13. If prompted to allow the installer to access files in your Downloads folder, click **OK**.

14. Once the Monitoring Point is installed, the AppNeta Monitoring Point menu bar app will appear on your menu bar at the top of your desktop.

Click the menu bar app and confirm that the Monitoring Point service is running.
